ABOUT US

Twelve years of building reliable IT for Indian businesses — from a single laptop rental to enterprise-scale infrastructure.

Great Ocean Comptech Pvt Ltd (GOCPL) was founded in **2012** in Pune with a single, clear mission — make enterprise-grade IT accessible, reliable, and transparent for every business, from agile startups to established enterprises.

Over the past decade, we have grown into a trusted partner serving **200+ clients across India**, delivering hardware sales and rental, cybersecurity, networking, storage, cloud (AWS, Azure, GCP), mail solutions and managed IT services.

What sets us apart is our **customer-first approach** — customised solutions, transparent pricing, and long-term partnerships backed by multilingual support in Marathi, Hindi and English.

"We do not just sell IT — we engineer it for your business, support it for the long run, and keep it running so you can focus on what you do best."
